

Top Ten Reasons to Take Training with

1. International Accreditation

Taking the exam with us will provide you with an Internationally recognised qualification as a Certified Passive House Consultant, on a par with all other nations across the globe.

2. High Quality Training materials

Included in the cost of our course is a high quality 1,000+ page colour training manual which you can use throughout your career as well as being an invaluable resource for the open book exam.

3. Locally Relevant Training

As part of our core training, we include local experts in the delivery of regionally specific guidance, we always have local Passive House contractors to share their experiences on site and we always visit at least one local completed Passive House project to see, touch and feel what is really going on. You will thus be equipped to deal with Passive House projects in your area.

4. Exemplary Exam Prep Material

We have excellent training materials which help participants prepare for the International exam. Our approach includes a number of 'dress-rehearsals' where participants have to complete exam-type questions under-the-clock.

5. Part of a Suite of Courses

We don't just deliver the Passive House Consultant course. We also have tailored courses on PHPP, Thermal Bridging, Passive House Craftsmen Envelope and Passive House Craftsmen Mechanical Systems. We thus have a very good overview on all things Passive House.

6. Not Just Trainers

We're not only involved in delivery of training, but we are also internationally accredited Passive House Certifiers (currently working on six projects in NYC), and we also design and build our own projects. We built one of the first Certified projects in the English speaking world and have been living there for the past 7 years.

7. Excellent support services

We are well resourced in terms of experienced support staff and provide an attentive service to all our Clients. Whether you need follow-on advice on window fitting details, tricky PHPP issues, feedback on your exam paper or getting your AIA CES credits, we are always happy to help.

8. International Perspective

With headquarters in Europe, we are well informed about technological developments on both sides of the Atlantic and have easy access to innovative case studies such as fire stations, shopping malls and offices.

9. Engaging Trainers

We really love what we do, and this shows in the classroom. We will engage you, test you, keep you awake and have you smiling. Learning should be fun, right?

10. Don't Just Take Our Word for it
